# I'm a Failure

(I hope you are, too!)

What will the students think if you try to use technology and it fails -- or you do?

Trust me: they are accustomed to failure. They expect it. But most importantly, **they learn from it.**
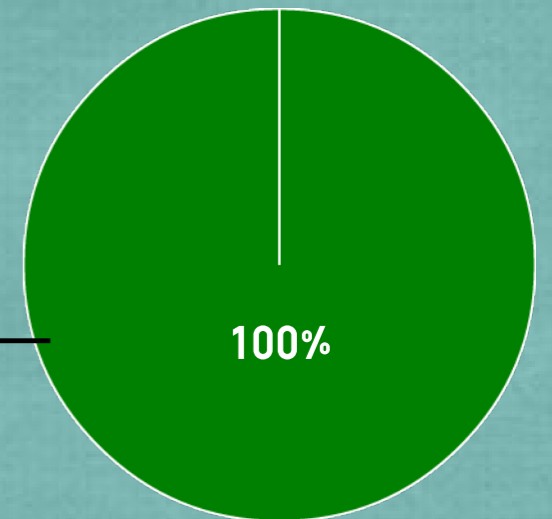

Technology is a lot of "I don't know". Trying something new is going to lead to "I don't know". And "I don't know" is a great lesson for the students, when it's followed by, **"Let's find out."**

I've missed over 9,000 shots in my career.
I've lost almost 300 games.
26 times I've been trusted to take the game-winning shot -- and missed.
I've failed over and over and over again in my life. And that is why I succeed.
– Michael Jordan

Don't let failure lead to frustration. It's okay to admit defeat. We won't laugh. (Much.)
